

Can your business afford to lose it all? VivaVault® will get the job done – every time.

AFFORDABLE, SECURE & ULTRA-RELIABLE DESKTOP DATA BACKUP & RECOVERY

Restore lost files in a manner of seconds...

You probably have insurance on your business premises and your house – but what about your data? The fact is that most people don't take the time to properly secure and protect their information.

Did you know that as much as 60% of corporate data is sitting unprotected on PC desktops and laptops? Were you aware that 90% of businesses that lose their data in a disaster are out of business within two years? In this on-demand world, you can't afford to have your business shut down – or diverted from fighting the competition – because you've lost mission-critical data. Now there is a simple and affordable way to ensure that your company is protected and your PC backups are always up to date.

Arryba's VivaVault® secure desktop backup and recovery is the best way to protect your business from human error and disaster. At the same time you can make sure your business complies with the privacy and documentation retention laws in Canada. Restore your secure data instantaneously from an internet connection in the world anytime. VivaVault® significantly reduces the risks, costs and hassle of data backup and recovery.

How VivaVault® Works

The days of tech guys running around working frantically to oversee a full backup are over. Use your tech resources to grow the business – not babysit your data. With VivaVault®, our server backs up files on the selection list. The files are compressed/encrypted and then transferred to our secure online storage server via VLAN. Retrieving files is equally easy – just connect to the online storage server, retrieve your data and your immediately back in business!

Driving technology at the speed of your imagination...

Features and Benefits

Continuous Backup

- We backup your files as you create them.
- Backups pause while your typing, continues when your not.
- It never forgets to make a backup

Secure Offsite Storage

- Your data is stored offsite in our state of the art data centre.
- All data is encrypted before it leaves your PC.
- We use the strongest encryption available.

Set It and Forget It

- No files to upload.
- No tasks to remember.
- Once installed, the backup client does it all automatically.

Super Efficient

- You select the files to be backed up.
- Backs up only the data that changes.
- Backups are quick and efficient.
- It even works great with dial-up internet.

Web Access

- Download your files from any web browser.
- Instant access from anywhere.
- Get to your work files from home, or your home files from work.

Web File Sharing

- Give people passwords to access selected files or entire folders.
- Keep everybody current by sharing files with team members.
- Email links to large attachments to people with limited inbox space.

File Versioning

- Keeps multiple versions of each file.
- Restore older versions of a file even if you have made changes.
- Restore files even if you've deleted them from your hard drive.

One Simple Rate Plan

- You can back up as many PCs as you like.
 - All of your usage is on one simple monthly bill.
 - It's easy to keep all of your PCs safe from disaster.
-

Why VivaVault® is great...

Easy to set up. Register online and perform our "one click install." Backups with VivaVault® are instant and will never interrupt your work.

Extremely secure. Bank grade encryption protects your data from the moment it leaves your PC. Only you have the key to access your data.

Fast recovery. Restore lost files from your secure online storage in a matter of seconds.

Web file sharing. Share files or entire folders with others by emailing password protected links.

Piece of mind. Back up your valuable information with VivaVault® and sleep better at night knowing that every file on every computer in your organization could be restored in an instant tomorrow if disaster struck.

Mobile work force. Is your team on the road? VivaVault® will protect your organization from any internet connection in the world. Simply plug your laptop into an internet connection and the online data backup and recovery service will connect and backup any changed files since the last backup. No matter where you are – VivaVault® protects you.
